Selecting the correct size Bakkie Buddy for your vehicle:

We recommend that you double check the internal width of your vehicle before finalising your order. This can be done by measuring the internal width of your vehicle's loading bay.

- Should your vehicle's internal width measure between 1480mm-1560mm the correct model for your vehicle will be BB2 (1420mm)
- Should your vehicle's internal width be 1560mm-1650mm the correct model for your vehicle will be BB1 (1500mm)
